About Mobile Dental Photography

Dental Photography has become an integral part of clinical practice for legal, clinical & academic purpose. Photography & Documentation goes hand in hand and have been proven as the most powerful tool of convincing patient in clinical practice. In the Era of Smartphone, which is supposed to be very handy & convenient equipment; using mobile camera one can take absolutely sharp & clear images of the particular case.

Mobile Photography is becoming one of the fastest and easy ways to record or document clinical cases. This session will help practitioners to understand the use of Mobile Camera for recording day to day cases in a very convenient & easy way. **Dr. Akash Akinwar** has been documenting clinical cases with mobile camera since last 8 years and has more than 44 publications & many hundred well documented cases of Periodontics, Oral Surgery & Implant Dentistry. His aim is to motivate and teach Graduates, Post graduates & Practitioners to document cases which have many fold benefits in the clinical practice.

"Clicks" is a simplified and informative Mobile Dental Photography workshop that empowers Graduates, Post graduates & Practitioners to document their work using Smartphone (Mobile) camera.

So come & learn the tips and tricks of Mobile Dental Photography.
